

What's New in Version V2.7

Main improvements from V2.6h7

i) Added new features/ Icons:

LayerHandler (supplement of LSW)

KitsBox including shape Area/Perimeter calculator, Fix Offgrid.

ii) Added option to use ASSURA in extracting/highlighting nets, so the speed of extracting a big net is way faster than using skill.

Removed "No Connection By Poly/Diff " connection mode in extract/highlight net command form.

iii) Added environmental control variable for MPP, So CAD can disable Using MPP or save MPP as cell, and control the default via/contact spacing mode in MPP

iv) Changed the SKILLCAD icon bar. Now selectNet, extractNet, hiliteNet icons are replaced by one getNet icon. Added icons for layerHandler and kits.

v) The release contains 64bit context to support 64bit layout environment.

vi) Updated skillcad user reference menu.
